

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1. (Currently amended) A method of increasing mycorrhizal infection in a plant, the method comprising introducing into the plant an expression cassette containing a plant promoter operably linked to a heterologous LNP polynucleotide or complement thereof, wherein the LNP polynucleotide encodes an LNP polypeptide at least about 70% identical to ~~SEQ ID NO: 2, SEQ ID NO: 4, or~~ SEQ ID NO: 10, and selecting plants that have increased mycorrhizal infection.

2.-3. (Cancelled)

4. (Original) The method of claim 1, wherein the heterologous LNP polynucleotide is SEQ ID NO: 5.

5. (Original) The method of claim 1, wherein the plant promoter is from an LNP gene.

6.-8. (Cancelled)

9. (Original) The method of claim 1, wherein the expression cassette is introduced into the plant through a sexual cross.

10. (Cancelled)

11. (Previously presented) The method of claim 1, wherein the LNP polynucleotide is operably linked to the promoter in sense orientation.

12. (Cancelled)

13. (Currently amended) The method of claim 1, further ~~comprises~~ comprising infecting the plant with a mycorrhizal fungus.

Appl. No. 09/657,631
Amdt. dated December 15, 2003
Reply to Office Action of January 15, 2003

PATENT

14. (Original) The method of claim 13, wherein the mycorrhizal fungus is *Glomus intraradices*.
